

PURE REFRESHMENT

Discover ION Plus

Elevate Your Hydration™

Your employees and visitors deserve the best drinking water so they can stay hydrated and healthy throughout the workday.

Using refillable bottles like Yeti® or Stanley® eliminates single-use plastic bottles that endanger our environment.

Add in ION's energy-saving SleepMode™ to reduce power on evenings and weekends and start making a difference today.

Clean. Simple. Smart.

Why ION?

InstaChill™

Every glass is freshly filtered and instantly chilled in a Sealed Water Pathway where air never contacts the water supply.

Cooling Capacity

Dispense a 250ml glass every 30 seconds for an hour...and ION makes sure it's 45°F or colder. No other cooler comes close.

RapidHot™

Your favorite tea, hot cocoa, and instant soups are all instantly delicious with piping hot, freshly filtered water.

Make it Sparkle!

Indulge your healthy lifestyle with the healthy alternative to soft drinks. Refreshing with juice, or a twist of lemon or lime.

Easy to Use Interface

Large Touch Screen provides personalized dispensing options, including language and maintenance reminders.

CO2 Options

Your choice to connect CO2 to an internal 1 liter tank, or an external CO2 tank for larger volume.

Quick Filter Change

With a simple twist, easily remove the filter – no tools required and no turning off the water supply.

Smart Design

Save energy on evenings and weekends with ION's easily customized SleepMode™.

PURE REFRESHMENT

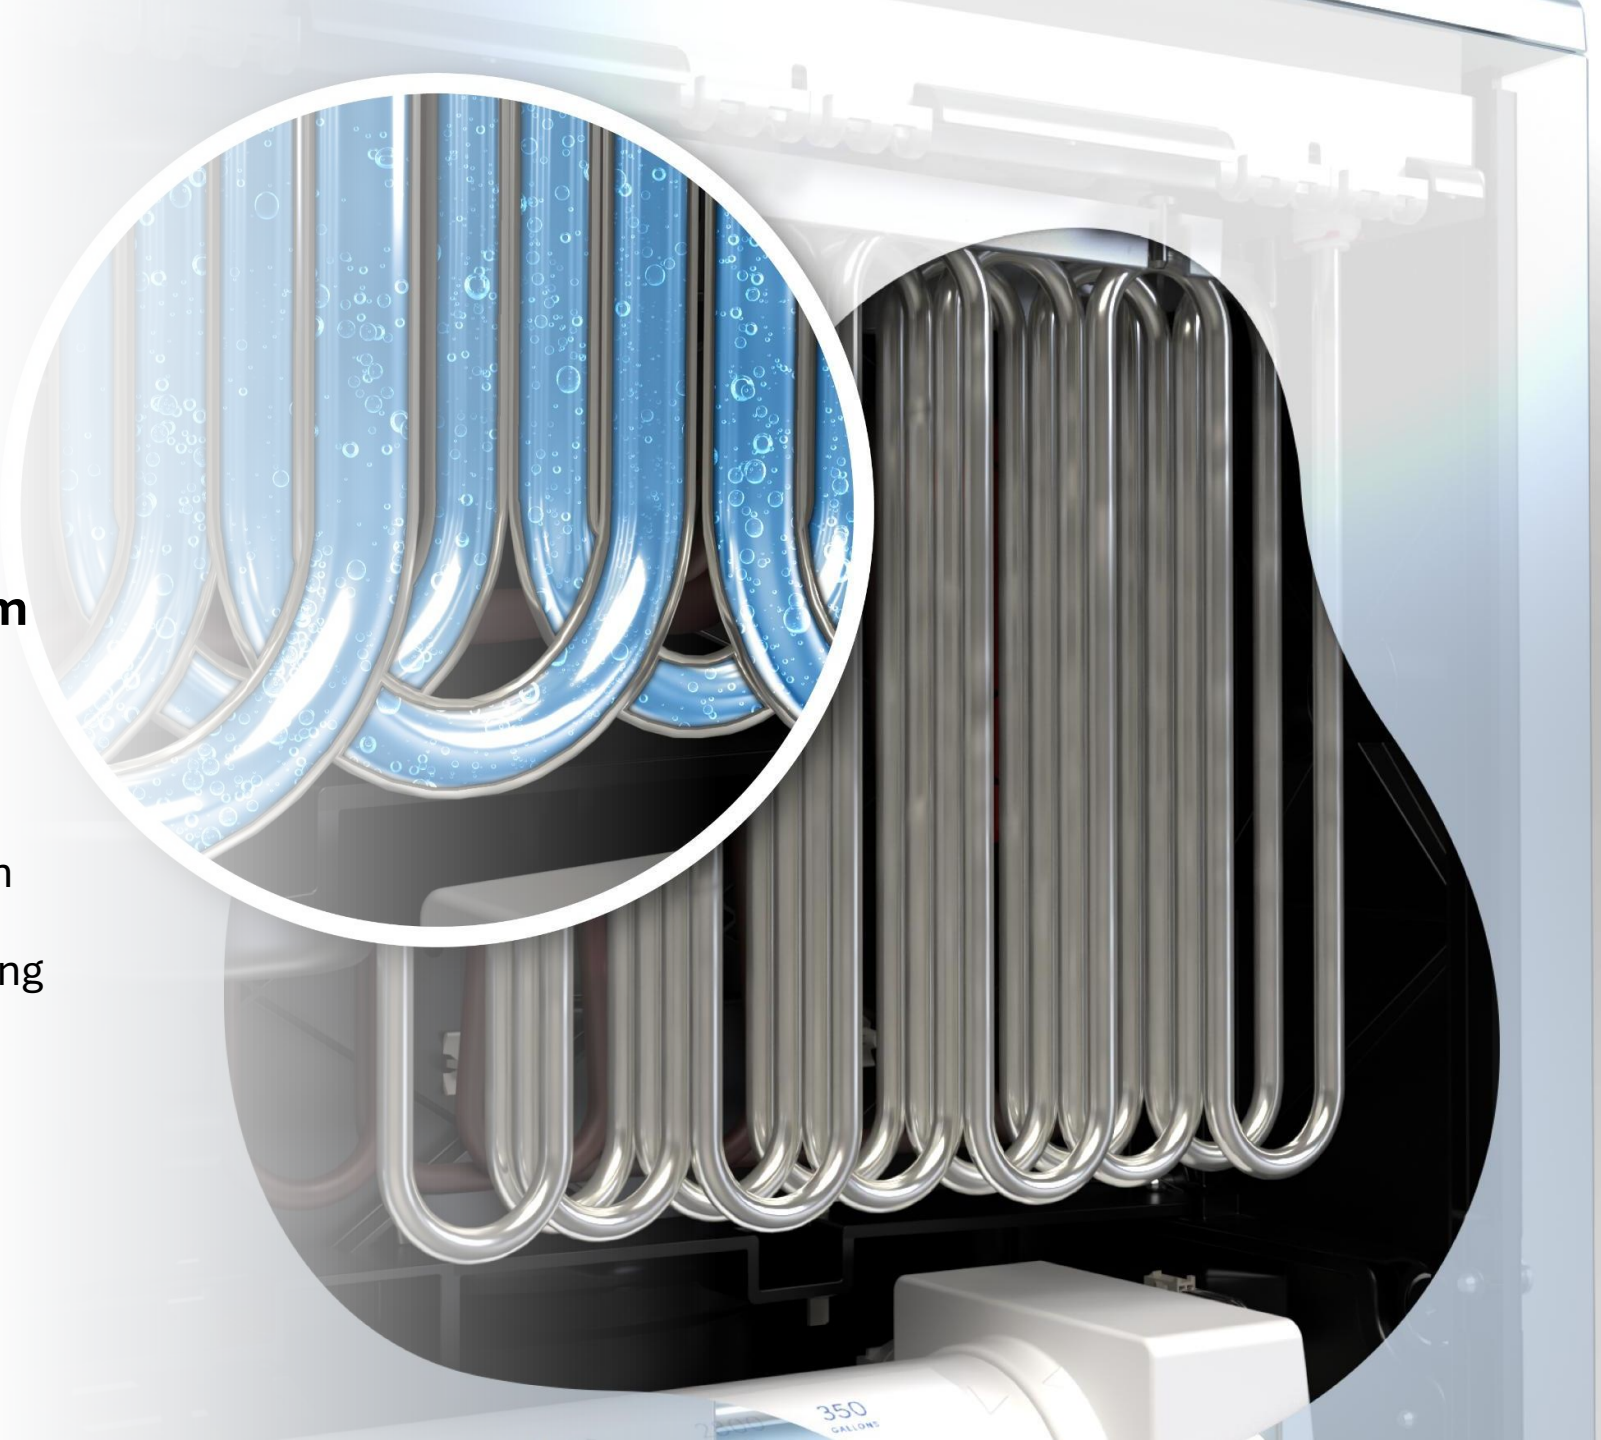

The Technology of Pure Refreshment

High-Capacity InstaChill™ System

Freshly filtered, instantly chilled.

Every glass of water is dispensed through a sealed water pathway that prevents air exposure—ensuring cleaner, better-tasting water with every pour.

InstaChill™ makes ION better.

The Technology of Pure Refreshment

RapidHot™

Instant hot water is a game changer in any kitchen, lunchroom, or lounge.

Enjoy tea, cocoa, and instant soups with freshly filtered, piping-hot water.

With output up to **2 gallons per hour**, ION dispenses hot water at temperatures up to **195°F (90°C)** delivering reliable, continuous performance without waiting.

The Technology of Pure Refreshment

Sparkling Water Made Easy

ION combines ice cold filtered water and CO₂ at the ideal pressure for a perfectly carbonated refreshment.

For homes and smaller offices, an **internal CO₂ tank** easily installs with a simple twist—no tools required.

For larger offices and high-demand environments, **external CO₂ options** provide extended capacity and uninterrupted performance.

BasePlus™

- **Quickly Convert** ION Plus from a countertop to a stand-alone, with multiple storage options.
- **Easy Set Up** – Secure ION Plus directly to BasePlus™ with screws (wall anchor kit included).
- **Interior Storage Shelf** – Store extra filters or supplies inside.
- **CO2 Tank Storage** – Extra space underneath shelf allows for storage of larger CO2 tanks.
- **Optional Drain Kit** – Can easily be placed inside the cabinet and emptied periodically.

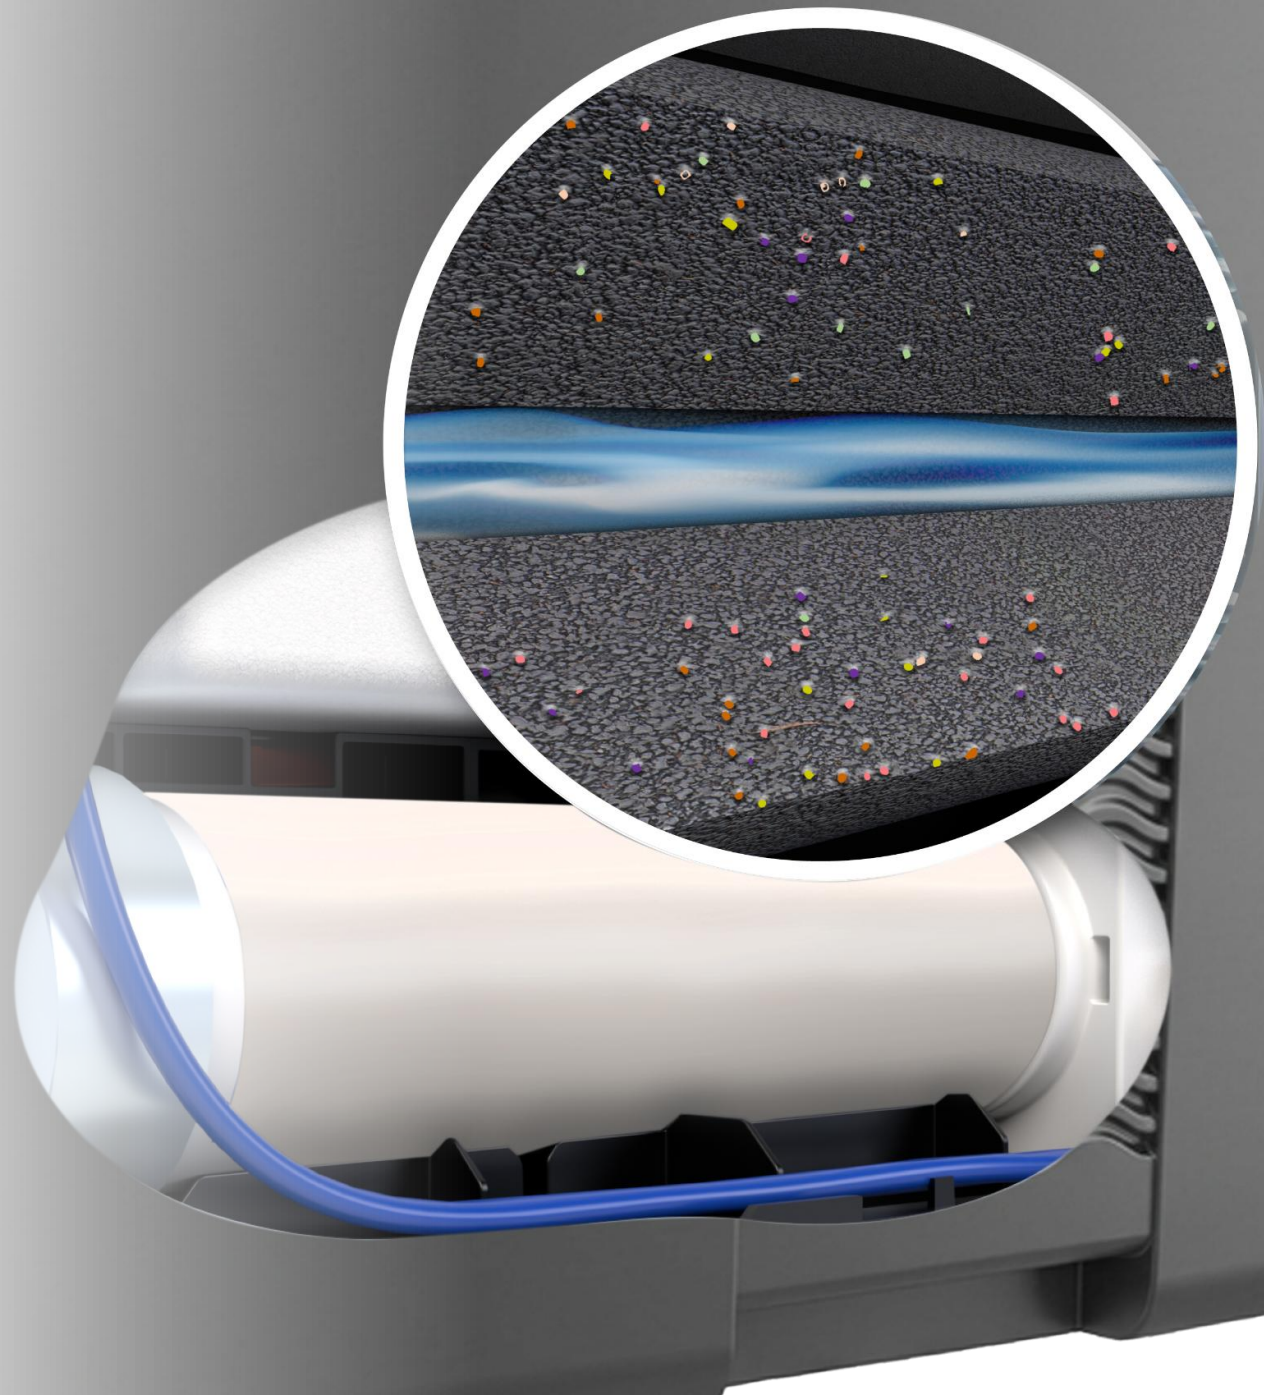

Better Water by Design

ION filtration systems use high-performance filtration technology, including steam-activated carbon, to reduce a wide range of contaminants.

FiberTek™ filtration helps reduce chlorine, unpleasant tastes and odors, lead, cysts, and microplastics.

ION provides a proven solution to improve the taste and quality of your drinking water.

perfect water everywhere
